

Student Chromebook Login for the i-Ready Inform Assessment (K-8)

**** Updated 8/12/26 - i-Ready Diagnostic is now i-Ready Inform Assessment ****

See the next page for troubleshooting tips.

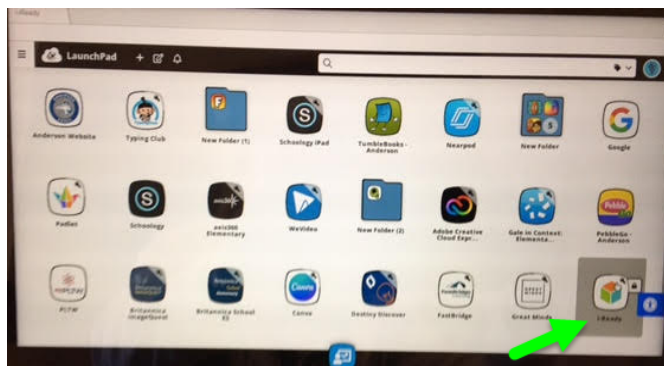

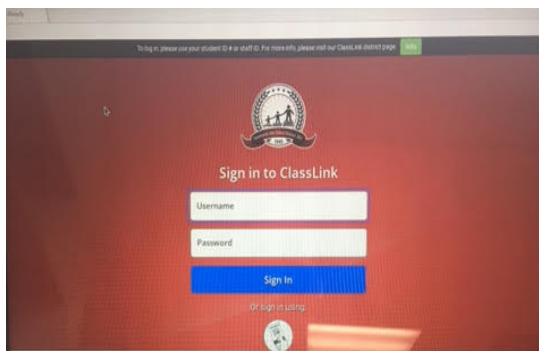

Using a school issued Chromebook

Best practice prior to any testing is to clear the cache and browser history then establish a fresh connection to the device by clicking the power button and choose shut down. If applicable, make sure that screen readers, accessibility devices, or bluetooth are connected / working. Check that headphones work.

Proctors - Keep track of students' progress see link for directions on [How do I Check the Inform Assessment Status](#)
Refresh  your browser frequently to stay synced.

1. Sign into their Chromebook & Classlink.

- 1.1. Enter the username and password.
- 1.2. Username is student ID# (just the number, do not include the @students.d303.org).
Password is the student's regular Chromebook password (K-5 can use QuickCards here).

2. Once logged into ClassLink, they will see the LaunchPad where they will have access to many applications. Look for / click on the **iReady icon**.

2.1 The system will automatically put them in a *secure browser environment.

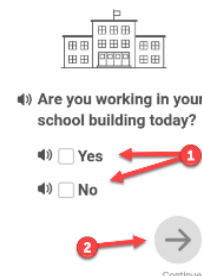

***Note:** The Secure Browser cannot be used in conjunction with any other apps or extensions (Zoom, Google Meets, etc).

3. i-Ready will open and they will be ready to go

- 3.1. Click on a subject. The teacher will let students know which one to take on which day.

4. Once in i-Ready, students will be asked if they are working in your school building today?

- 4.1. Check the **Yes** box.
- 4.2. The Continue button will turn green after they click **Yes**.

5. After clicking **Continue**, students will watch a video with instructions on how to take the i-Ready Inform assessment. Once this is complete, the student will begin to answer questions.

6. Remind students:

- To try to answer each question, but do not stick too long on a question you are unsure of. Answer it to the best of your ability and move on to the next.
- That their best effort on the Inform assessment will provide them with the best personalized learning pathway.

See the next page for troubleshooting tips.

Student Chromebook Login for the i-Ready Inform Assessment (K-8)

**** Updated 8/12/26 - i-Ready Diagnostic is now i-Ready Inform Assessment ****

Troubleshooting

The dreaded gray screen (Session Complete message) will happen:

- If a student logs in and they don't have an Inform assessment assigned.
- If a student logs in and immediately clicks on the X in the top right corner of their dashboard.
- If a student is in the Inform assessment and clicks on the X in the top right corner.
- When a student completes their Inform assessment.
- The session timeout limit is set to 30 minutes. If the student is idle longer than 30 minutes, they will see the gray screen because they will be automatically logged out.

Helpful tip: Proctors - To better assess the gray screen issues, keep track of students' progress. See link for directions on [How do I Check Student's Inform Assessment Status](#) Refresh  your browser frequently to stay synced.

As stated above in paragraph one:

Best practice prior to any online testing is to clear the device's cache and browser history then establish a fresh connection to the device by clicking the power button and choosing shut down.

Students not able to select an answer - Chromebook Mouse Pad vs Touch Screen

If a student is having issues clicking on anything ***please make sure they are using the mouse/trackpad*** (not the touch screen) to move the cursor when selecting answers ***and*** to click the "done" button.

This from i-Ready *"Our tests are only set up for trackpad input, so the test prioritizes the location of the trackpad's cursor over touch input. So, if the cursor is hovering over an answer choice, that choice will show as selected, even though the student might be trying to touch another choice on the screen. This happens with the 'done' button too. To avoid this, we suggest students use the trackpad exclusively during tests instead of touching the screen"*
